

“The “PRO-Sport Rower” Lifejacket has been developed with the A.R.A specifically for Rowers, Scullers and Coxes. The “PRO-Sport Rower” is the only Lifejacket presently available which has been designed by Rowers for Rowers. The “PRO-Sport Rower” has been rigorously tested and approved to European safety standards. The “PRO-Sport Rower” is suitable for a weight range of 32 Kgs or more. This will minimise the number of units each club will require and simplify safety procedures within the clubhouse.....”

This lifejacket is designed and manufactured to comply with the European standard EN396 - 150 Newton Lifejacket

The Pro-Sport Rower 150 Newton Lifejacket

The Sport Pro range of lifejackets is designed for the professional sports user. The waist coat ensures that the lifejacket fits many sizes whilst still providing comfort and ease of use. It's slim line design and light weight make the Sport one of the leaders in the leisure lifejacket market. The simple zip fastening method enables speedy donning and simple buckle tensioning system, coupled with a twin zippered closure system and independent stole providing 174 Newtons of buoyancy ensure the lifejacket delivers maximum performance. The inflatable stole used for the buoyancy of the lifejacket is the same used in the Commodore and Compact 150 range of lifejackets, this tried and tested shape of buoyancy ensures that historical performance data is combined with a modern and compact shape pouch.

Size Range: 32 Kgs or more

“The high body position and Flat profile of the “PRO-Sport Rower” minimises interference with the normal rowing action.

The “PRO-Sport Rower” has a front Zipper for easy Donning and open sides and back to minimise overheating during strenuous training.”
